## **Liquid Crystal Display (LCD) Technology**

PG Technologies supplies Liquid Crystal Display (LCD) Technology to a variety of industries. Using the latest production processes, our manufacturing facility has developed a wide range of products capable of meeting today's market demands.

We can assist with design and development of all types of custom LCD panels and modules, e.g. TFT, TN, HTN, STN, FSTN and COG types. All products are manufactured in a state of the art manufacturing facility with an annual output and volume now standing at 42,000,000 panels and 1,170,000 modules. Diverse production processes provide flexibility to address all of your prototype, short runs to large production requirements.

Using the latest design software, our engineering team has developed a wide range of products suitable for various applications, including components servicing the utility and analytical instrumentation industries. Some of the advantages that we offer are as follows:

- Custom-designed LCD Panels.
- Custom-designed Character, Graphic, and Alpha-Numeric LCD Modules.
- Large range of Standard LCD Panels.
- Large range of Standard Character, Graphic, and Alpha-Numeric LCD Modules.

All LCDs are manufactured under experienced supervision and strict process controls.

At PG Technologies, a sharp focus is placed on continuous product and process improvement. We are continually introducing new custom and standard LCD's platforms for both the domestic and international markets. If you are interested in any of our products, or have a customized need to fill, please contact us. Our world-class pricing and flexible manufacturing lead-times are among the most competitive in the industry. We look forward to working with you on your LCD needs.
